

Generator Synchronization Panel

Synchronization panels are mainly designed and used to meet power system requirements. These panels function both manually and with an automatic synchronizing function for one or more generators or breakers.

They are widely used in synchronizing generators and offering multiplex solutions.

Our high quality range of DG synchronizing panels is available with capacities that reaches 10000 A, and are fabricated by our engineers using premium quality electrical components including copper bus bar, insulations, wires/cable, PVC channels, transformers, meters and switches.
